

Building Requirements Context

Overview: In this training module, you will learn how to build and edit requirements. Requirements are 1 of the 3 items (Documents, **Requirements**, Skillsets) that need to be built for employees to receive assessments and they are what attaches a document to a skillset. You can have multiple documents associated to a requirement.

What to expect: Training PDFs, Training Video, and Walk-Thru's

What you should learn:

- How to Navigate to the Browse Requirements perspective in the setup tab
- The different types of requirements and what they are used for
- How to create a requirement
- How to associate a document to a requirement.

Level: System Admin

Useful Walk-Thru's:

- Create New Requirement
- Create New Requirement Folder
- Add Document to Requirement
