## 2 | Edit Questions

### Edit Questions

1. Click [Edit](#).

The screenshot shows a 'Problem Solving' interface with a question titled 'Question 1'. The question text is 'What does "precision" measure in the clinical laboratory?'. Below the question, there are four multiple-choice options: 'a. the closeness of a test result to its true value', 'b. reproducibility', 'c. precision is not a measured parameter in the laboratory', and 'd. variance between test runs'. The correct answer is indicated as 'ANSWER: b. reproducibility'. There are also icons for 'no additional details' and 'no attachments'. In the top right corner of the question card, there are three buttons: 'Edit', 'Copy', and 'Delete'. An orange arrow points to the 'Edit' button.
